The Subjective Happiness Scale (SHS) is a four-item scale, measuring global subjective happiness from 1999. The scale requires participants to use absolute ratings to characterize themselves as happy or unhappy individuals, as well as it asks to what extent they identify themselves with descriptions of happy and unhappy individuals.

CARGO POCKET BAG ↗

€23.99

Designed for slow mornings, long summer evenings, and everyday rituals.

More than just a bag, it becomes part of a feeling: warm grass under your feet, light on your skin, music playing somewhere in the background, and nowhere you need to rush.

A simple object made to carry moments of happiness.

happiness

This collection is dedicated to happiness:

To lie on warm grass and feel the earth holding you. To look at the sky where nothing is excessive – only air, light, and time. To hear the wind passing through you like a thought without words.

It's when there's nothing to prove and nowhere to rush. When you simply are – and that is enough.

It is the freedom of being small in a vast world – and at the same time feeling completely in your place.
